

OFIR HALBERSHTAT

Cloud Security Architect · DevSecOps Leader

+972-54-764-3249 halbershtatofir@gmail.com LinkedIn Portfolio

SUMMARY

11+ years securing SaaS, fintech, and industrial environments across CSPM/CWPP, Zero Trust, AppSec pipelines, SIEM/SOAR, and OT security. Led cross-functional teams to deliver 70% cloud misconfig reduction, zero critical vulns in production, 87% detection/response SLA.

EXPERIENCE

Independent Security & AI Development

Independent

- 2024 – Present Kfar Bilu, Israel
- Built SecureRDP: Production reverse SSH tunnel + Terraform AWS jump server for secure remote access to corporate networks.
 - Developed VulnMgmtAgent: AI-powered vulnerability clustering (71% noise reduction) with Jira integration for alert fatigue.
 - Created TipIT: Full-stack SaaS tipping platform (FastAPI/PostgreSQL/React Native/Terraform/Stripe) for hospitality workers.

Product Security Team Leader

Own

- 2021 – 2024 Tel Aviv-Yafo, Israel
- Led product security for a \$240M-ARR SaaS platform protecting 6,000+ enterprise customers. Full project details in portfolio.
- Built and matured an enterprise Vulnerability Management program, automating scanning and remediation workflows, enforcing risk-based SLAs, improving asset coverage, and achieving a **30% increase in remediation compliance** and vulnerability risk reduction.
 - Developed and operationalized a Secure SDLC program, embedding security controls into the software development lifecycle, enforcing secure coding practices, and increasing product change tracking coverage to **95%**.
 - Led shift-left security by embedding Nexus Firewall, Snyk, SonarQube, and Burp Suite as GitHub Actions gates — eliminating critical vulnerabilities from production, **cutting costs by 25%** while **accelerating delivery by 20%**.
 - Modernized identity and access management across 10+ providers using Entra ID PIM and Conditional Access — enforcing MFA everywhere, eliminating legacy auth, and **reducing standing privileged accounts by 60%**.
 - Developed an incident response program and unified threat detection platform — routing telemetry through Cribl into Splunk with PagerDuty and Slack for alerting — achieving **50% faster MTTR**, 87% SLA compliance, and cost-controlled SIEM scaling.

EDUCATION

Computer Science

The Open University
2000 – 2004 Ramat Gan, Israel

TECHNICAL SKILLS

CSPM / CWPP	Wiz · AWS Security Hub · Microsoft Defender for Cloud
ZERO TRUST	Cloudflare Zero Trust · Entra ID PIM · Azure AD Conditional Access · JumpCloud
DEVSECOPS	Snyk · SonarQube · Sonatype Nexus Firewall · Burp Suite · GitHub · GitLab
SIEM / SOAR	Splunk (SPL, SOAR) · Cribl · PagerDuty
IAC / SCRIPTING	Terraform · Python · Bash · PowerShell
CLOUD	AWS · Azure
OT / ICS	ISA/IEC 62443 · Cisco Umbrella
AI SECURITY	LLM agent security · MCP server hardening · Prompt injection defense · SBOM
COMPLIANCE	SOC 2 · ISO 27001 · IEC 62443 · CIS Benchmarks · PCI-DSS · NIST CSF · MITRE ATT&CK · CSA CCM
VULN MGMT	Rapid7 · Qualys · Tenable
FIREWALL	CheckPoint · Palo Alto · Fortigate · Security Groups (SG) · Network Security Groups (NSG)

**CISO-as-a-Service**

Orbia business units – Koura, Alphagary, Vestolit
(via BDO)

2020 – 2021 Remote

Owned security strategy for a \$6B chemical manufacturing group with 5,000+ OT devices across 5 continents. Full project details in portfolio.

- Established IT and OT governance and risk management, including centralized IT asset inventory using ManageEngine Asset Explorer.
- Designed and enforced IT/OT network segmentation and access policies to limit lateral movement into sensitive OT environments.
- Led vulnerability management rollout with Qualys and Rapid7, defining scanning strategy, prioritization, and remediation workflows with IT and operations.
- Implemented DNS-layer security for global sites to block malicious domains and reduce malware and command-and-control risk.
- Implemented incident response capability by integrating security telemetry with an external SOAR service for automated triage and playbook-driven response.

**Senior Security Consultant**

BDO Israel, Secoz Security Center

2017 – 2020 Tel Aviv-Yafo, Israel

Secoz Security Center: Israel's premier cyber defense center delivering 24/7 MDR services, cloud security consulting, and OT security using ArcSight ESM and Microsoft Sentinel.

- Founded Cloud Security Consulting Services, delivering cloud security assessments, architecture design, threat modeling, and CSA Framework/ISO 27001 compliance for cloud-native SaaS companies.
- Delivered CISO-as-a-Service to multiple enterprise and high-tech clients, designing security governance programs, establishing security policies, and ensuring compliance with regulatory and security requirements.

**Security & DevOps Engineer → Senior Administrator**

Sage Group Ltd

2011 – 2017 Ramat Gan, Israel

Sage Group Ltd: IT integrator serving fintech customers with cloud migration, security solutions, and managed IT services.

- Led IT for fintech customers: built HA network architecture (CheckPoint/Fortigate FW), network segregation vs supply chain attacks, DLP integration, AV systems.
- Pioneered cloud/DevOps: self-taught AWS deployments, multi-cloud DRP (ransomware protection, backup solutions), HA via open source monitoring, DevOps services.
- Progression: managed 4-person help desk (2012–2014), then expert admin scaling secure infrastructure during fintech cloud transition.

2019 – AWS Architect

John Bryce

2018 – Cloud Security Knowledge CCSK

Cloud Security Alliance

2014 – VMware vSphere
