EXPERIENCE

Independent Cybersecurity Consultant

CloudGaurd

📅 2024 - Present

- Conducting freelance security consulting.
- Expanding expertise in cloud, AI, and product security through continuous learning.

Product Security Team Leader

Own

📅 2021 - 2024 📍 Tel Aviv-Yafo, Israel

Directed the ongoing implementation of new protection layers for company products, addressing risks identified through threat modeling.

- Established and owned the vulnerability management process, crafting strategies for rapid detection, analysis, and remediation of vulnerabilities, driving a 30% improvement in security policy compliance.
- Integrated the Secure SDLC process into development, elevating product change tracking coverage to 95%.
- Championed DevSecOps initiatives and the shift-left approach, embedding application security controls into development pipelines, cutting costs by 25% and accelerating delivery by 20%.
- Developed an incident response program and enhanced monitoring and alerting capabilities, achieving 87% compliance with detection and response SLAs.
- Collaborated with cross-functional teams to develop and enforce an OSS license compliance tracking and management process.

Chief Information Security Officer (CISO)

Orbia: Koura, Alphagary, and Vestolit

📅 2020 - 2021 📍 Remote

Directed the organization's information security strategy, while governing security policies, cloud protections, and DevSecOps integration. Forged partnerships with IT and business units to embed security into operations, driving secure digital transformation and quantifiable risk reduction.

- fortifying network defenses through strategic network segregation and securing 50% greater coverage across critical systems.
- Deployed vulnerability management programs that slashed remediation time by 20%

Senior Security Consultant

BDO Israel, Secoz security center

📅 2017 - 2020 📍 Tel Aviv-Yafo, Israel

- Founded and led Cloud Security Consulting Services, delivering Cloud Security Assessment, Architecture Design, and Cloud Compliance & Governance Implementation.
- Delivered CISO-as-a-Service by designing security governance programs, establishing security policies, and coordinating vulnerability management to protect enterprise systems and assets from cyber threats.
- Performed security risk analyses on information systems or applications, identified vulnerabilities, recommended remediation measures, and supervised implementation.

Security Systems Administrator

Sage Group Ltd

📅 2015 - 2017 📍 Ramat Gan, Israel

Manage computing infrastructure and information security for financial and fintech organizations across on-premises and cloud environments.

- Manage computing infrastructure and information security for financial and fintech organizations across on-premises and cloud environments.
- Design and implement disaster recovery solutions using multiple cloud services.
- Integrate secure monitoring solutions.
- Deploy and manage endpoint detection and response (EDR) systems.
- Develop, implement, and enforce data security policies.
- Maintain and deploy the network and firewall solutions to ensure high availability and data security.
- Design and implement mobile security policies and technical controls.
- Establish, integrate, and maintain DevOps development environments.

EDUCATION

Computer Science

The Open University

📅 2000 - 2004 📍 Ramat Gan, Israel

TRAINING / COURSES

2019 - AWS Architect

John Bryce

2018 - Cloud Security Knowledge (CCSK)

Cloud Security Alliance

2014 - VMware vSphere
